

METRO AIR FORCE BLASTER AND MASTER BLASTER

Congratulations! You now own the most powerful forced air high velocity dryers ever created.

The METRO AIR FORCE BLASTER and MASTER BLASTER dryers are designed to cut drying time by as much as 75%. The BLASTER and MASTER BLASTER dryers provide "Gentle Heat" and dramatic air velocity to dry dogs and animals quickly and blow out their coats and undercoats, simultaneously.

Follow these steps to use your new dryer:

- 1) Insert the grounded power supply cord.**
- 2) Fit the 10 Ft. by 1-1/2" hose over the steel tube protruding from the front end cap of the power unit. The adjustable clamp will keep the hose on the dryer securely.**
- 3) Start the dryer by pushing the toggle switch from left to right. (BLASTER)**

The MASTER BLASTER features 2 motors and 2 separate controls for each motor. Use 1 motor at a time (front or back) for two different levels of performance or both motors for maximum air flow.

The air velocity can be controlled by attaching or removing the neoprene nozzle from the hose.

SERVICE

NORMAL MAINTENANCE, SUCH AS MOTOR BRUSH REPLACEMENT, CAN BE MADE AT YOUR LOCAL SERVICE SHOP. MOTOR BRUSH LIFE IS APPROXIMATELY 500 HOURS. BRUSHES SHOULD BE CHECKED BETWEEN 200-250 HOUR INTERVALS. SEE ENCLOSED INSTRUCTIONS. FILTER LIFE IS DEPENDENT ON USAGE. CHECK AND REPLACE WHEN REQUIRED.

CAUTION: DO NOT DROP THIS APPLIANCE. MOTOR MALFUNCTION CAUSED BY PRODUCT BEING DROPPED IS NOT COVERED UNDER WARRANTY.
